Title: Applying Gallup StrengthsQuest Themes to Learning and Academic Success Strategies

Abstract:
Creighton University has partnered with Gallup to develop student, faculty, and staff understanding of their unique strengths and talents as identified by Gallup’s StrengthsQuest assessment. Gallup’s StrengthsQuest assessment provides individuals with information valuable to their own personal and professional development. These strengths can also be incorporated into a student’s learning and academic success efforts. This proposal aims to increase students’ awareness and application of their strengths to learning and academic success strategies presented through the School of Pharmacy and Health Professions’ PHA 347: Professional Seminar elective course.
