

# MASTER OF SECURITY ANALYSIS & PORTFOLIO MANAGEMENT (MSAPM) OUTCOMES

Creighton  
UNIVERSITY

Heider  
College of Business

Investing is one of the more complex, competitive and rewarding areas in finance. Creighton's Masters of Security Analysis & Portfolio Management (MSAPM) delivers advanced knowledge about investment assessment, security analysis and portfolio management, which is critical to those seeking top jobs in the field.

The MSAPM program is designed to prepare students for advanced security analysis and portfolio management guided by a Code of Ethical Practices and Professional Conduct and uses as its foundation the curriculum of the Chartered Financial Analyst® (CFA®) program. The CFA program is grounded in the practice of the investment profession. According to the CFA Institute, the program of study for the CFA charter is based on "a job analysis survey involving CFA charter holders around the world to determine those elements of the body of investment knowledge and skills that are important to the professional practice of investment management." The MSAPM program of study has a significant foundation in theory as well as practical applications of the theory and tools provided.

Creighton's MSAPM program is designed around all three levels of the CFA exam and is taught exclusively by faculty members with the CFA designation. In a field where the CFA credential is the gold standard, our intense program is an invaluable asset for those looking to either advance their careers or transition into the world of investments, security analysis or portfolio management. The curriculum covers a significant portion of the topics of study for all three levels of the CFA exam. Creighton University is one of only 118 universities worldwide that have earned the distinction of being a CFA Program Partner.

**THE AVERAGE SALARY FOR A 2014 CREIGHTON MSAPM GRADUATE WAS \$95,000 WITH A SALARY RANGE OF \$40,000 – \$250,000.**
