The Surgical and Restorative Advantages of a Conical Connection Implant

Lyle C. Yanagihara, DDS, MS

FEBRUARY 22, 2013

8:30 - 11:30 am
The Surgical and Restorative Advantages of a Conical Connection Implant

The focus of implant dentistry has changed significantly from the era of ‘anatomically driven implant placement’ to the current practice of ‘restoration driven implant placement’. Today when we look at the failing dentition we must immediately consider conversion to implant restoration. We are continually seeking greater control of the peri-implant tissues and ultimately the aesthetics of the restoration. A new paradigm shift to Tissue Care Concept, along with the advances in implant surface engineering and implant/abutment designs allow us to consider immediate implant replacement, especially in the aesthetic zone, where preservation of hard and soft tissue is of paramount importance.

LEARNING OBJECTIVES:

At the conclusion of this presentation, the participant should be able to:
• Understand “where we have been” with dental implants
• Discuss the Tissue Care Concept
• Have an understanding of implant biocompatibility (hard and soft tissue responses)
• Have a scientific basis for implementing immediate implants into your practice

Dr. Yanagihara earned his DDS from Creighton University School of Dentistry. He became a Junior Fellow in Oral and Maxillofacial Surgery at Emory University and completed his Oral and Maxillofacial Surgery Residency at the University of Iowa Hospitals and Clinics, where his Master’s thesis dealt with using implants as anchorage for orthodontic tooth movement. He is the past Chief of Dental Surgery at the Hawaii Medical Center and maintains a private practice in Honolulu, Hawaii.

This course will be presented at Creighton University School of Dentistry. Continental breakfast and final check-in will begin at 8:00 a.m. Class will begin at 8:30 a.m. and conclude at 11:30 a.m.

All registrations received at least 1 week prior to the course will be acknowledged. A full refund will be given if the cancellation is received prior to the beginning of the course.

Creighton is an approved CE provider by the states of Iowa, Kansas, Minnesota and South Dakota. The courses with credit hours meet the requirements for credit in Nebraska.

Creighton is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Creighton University School of Dentistry designates this activity for 3 continuing education credits.

Credit hours: 3     Tuition: $80
