Paramedic Certification Course for Health Care Professionals
Application

May 9-20, 2011
July 11-22, 2011
October 10-21, 2011
Course Description

The course is designed to prepare the currently credentialed critical care health care professional for the assessment, care, transport and communication requirements of the sick and injured in the out-of-hospital setting. While giving an active health care professional (R.N., M.D., D.O.) credit for their clinical and educational expertise, this course supplements and augments skills already gained to enable the participant to function as a valuable pre-hospital team member with both ground and air service programs. After successful completion, the participant will meet eligibility requirements to complete the National Registry examination for Paramedics.

Prerequisites: R.N., M.D. or D.O., EMT Basic Certification, two years critical care experience, ACLS provider, trauma and pediatric course certificate.

Didactic training is scheduled during the day, OR time to perform intubations will be scheduled with local hospitals in the mornings prior to classroom time. Field Internship for assessments with local fire departments and ambulance services will be scheduled evenings/weekend during the two-week course. Successful completion of the course requires each student to obtain 50 team leads. This may not be accomplished during the 2 weeks of class, so arrangements can be made with Creighton University EMS Education and your local EMS agencies to complete these in your local area.

The Creighton University EMS Education Program is approved by the Nebraska Department of Health to provide EMT education. Questions regarding reciprocity should be directed to the individual's state EMS credentialing agency for requirements.
