

Interdisciplinary Neuroscience Research

at Creighton

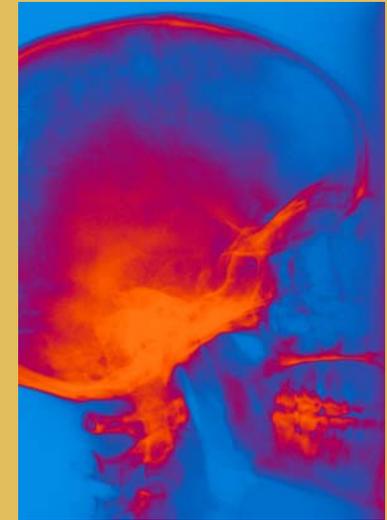

Please join Dr. Tom Murray, Associate Vice President for Research, Health Sciences and Professor and Chair of the Pharmacology department for a conversation about current Interdisciplinary Neuroscience Research at Creighton.

Topics of discussion will include:

- ◇ The current multi-institutional, interdisciplinary, neuroscience grant and the research being performed at Creighton
- ◇ Other current research in neuroscience.
- ◇ Upcoming neuroscience symposium in October, 2013
- ◇ New neuroscience research grant opportunity

January 28, 2013
4-5 p.m.

Faculty Commons: light refreshments will be served

CUIC

The University Research Council in collaboration with University Relations is launching the Creighton University Interdisciplinary Conversations (CUIC). The CUIC is an opportunity for faculty to come together and discuss topics that lend themselves to interdisciplinary collaboration.

We know that Creighton has a unique opportunity as a modestly small yet diverse campus to engage in this interdisciplinary conversation and networking opportunity. University Relations is an important partner in these conversations in linking potential funding sources with interdisciplinary opportunities.
