

## **Master of Science in Information Technology Management (MS-ITM)**

### Program Goals

Upon completion of the graduate program, the student will be able to:

1. Explain the core concepts, capabilities, and tools of information technology.
2. Apply information technology and business knowledge in business-world contexts.
3. Apply analytical, critical thinking, and professionalism skills in a broad business context.
4. Demonstrate effective interpersonal communication and collaborative skills.
