Resource Trials Sponsored By Health Sciences Library

Creighton University's Health Sciences Library / Learning Resources Center is sponsoring trials for the following products: RefWorks and Unbound Medicine. To participate in these trials, visit www.hsl.creighton.edu/trials.html or contact the HSL / LRC Reference Desk (refdesk@creighton.edu or 280-5138).

RefWorks
RefWorks is a web-based bibliographic database manager that allows users to create personal databases by importing references from text files or online databases. Site-licensing of RefWorks would provide free access to Creighton faculty, staff, and students.
The RefWorks trial continues through April 30th.

Unbound Medicine
Unbound Medicine, the PDA component of Unbound Central, brings the latest information on drugs, interactions, diseases, tests, procedures, and journal literature to handheld devices. Titles available include 5-Minute Clinical Consult and Harrison's Manual of Medicine.
The Unbound Medicine trial continues through April 30th.

Please take a few moments to complete the evaluation forms. Your comments are of great importance to the HSL / LRC in determining the usefulness of the resources. Links to the evaluation forms are provided on the trial site (www.hsl.creighton.edu/trials.html).

Health Sciences Library’s own “Mover and Shaker”

Siobhan Champ-Blackwell, HSL / LRC Community Outreach Liaison, has been named to Library Journal's 2005 Outstanding Librarians list, receiving the publication's prestigious "Movers & Shakers Award".

Her primary goals as Community Outreach Liaison are to teach minorities to access cultural health information and to build partnerships with community-based organizations. Each of this year’s 51 “Movers & Shakers” are featured in the March 15, 2005 issue of Library Journal.

(The feature on Champ-Blackwell can be found at the following link: http://www.libraryjournal.com/index.asp?layout=articlePrint&articleID=CA510770)

Congratulations, Siobhan, on this outstanding achievement!
At the Learning Resources Center

Exam Master Online is available through the LRC website. Go to “LRC Hotpicks” and select “Board Review” category. This resource supports learning and preparation for the USMLE and more.

Compounding Sterile Preparations provides a broad overview of aseptic preparation of parenteral products, identifies and deals with the sterile products from each risk level, identifies clean room requirements, personnel requirements and quality assurance practices. Ask for DVD 27 or VC 4966.

Sigmoidoscopic Examination Simulator Model is now available at the LRC. This model allows the user to follow the contours of the large intestine, negotiate the sigmoid colon, splenic flexure, and hepatic flexure before viewing the internal structure of the ascending colon and cecum. As the flexible sigmoidoscope is withdrawn, the student can identify benign sessile, pedunculated and hyperplastic polyps, as well as cancerous lesions. There are 12 pathological conditions to diagnose. Ask for MD 108.

Interactive Anatomy is now available through the LRC website. Go to “LRC Hotpicks” and select the “Health Sciences Images and Tutorials” category. This Primal Pictures software is based on the Visible Human Project and provides images covering the entire body from skeletal to dermatones.

Endowed Book Funds Correction
In the February issue of the BICInformer, the article entitled “Endowed Book Funds” incorrectly listed two funds. The correct listing should be: Pasquale A. Carone, M.D. Endowed Book Fund Alessandro Trombetta, M.D. Endowed Book Fund
We apologize for the mistake.

Quik Bytes
To stay up to date on what is going on in the HSL between issues of the BICInformer, checkout Quik Bytes (http://www.hsl.creighton.edu/HSL/quikbytes/QuikBytes.html), an electronic newsletter published each Friday during the academic year. An alert that a new issue of Quik Bytes is available will be posted on JayNet News.

Lunch and Learn Series Thune Seminar Rooms 12:00 – 1:00 P.M.
Learning More About Outlook with Dana Olson, DoIT ............................. April 21st
Basics of Scanners and Scanning ..............April 28th

All of the books in the above-mentioned categories are from the “Pearls of Wisdom” Review Book Series. These books retail new from $29.95—$98.00 each.
For Information see the Circulation Desk, Phone 280-5109
AccessMedicine: Bigger and Better

McGraw-Hill's AccessMedicine.com is a web-based resource providing information from many of its key handbooks, textbooks and other reference sources. It includes the full text, graphics, images and illustrations in a user-friendly web format. AccessMedicine now features a more sophisticated search engine and can search across all the titles in the collection. In addition, every drug name in the text includes a link to the information on that drug in Clinical Pharmacology. The content is updated continuously.

The collection now includes Goodman & Gilman's The Pharmacological Basis of Therapeutics. Other titles include Harrison's Principles of Internal Medicine, Current Medical Diagnosis and Treatment, Hurst's The HEART, and AccessLANGE, a collection of 20 basic and clinical science references.

Prepare for the USMLE Step 1 and Step 2 exams with help from McGraw-Hill's online testing service, USMLEasy.com. AccessMedicine customers gain free access to half of USMLEasy.com’s 3,000 questions for Step 1 and half the 3,000 questions for Step 2.

AccessMedicine is listed on the HSL Library Resources page under E-Book.

Health Sciences Library Dedicates Books

The Creighton University Health Sciences Library is pleased and honored to dedicate books in the memory of the following individuals: The Rev. Richard D. McGloin, S.J., and Edward H. Grinnell, M.D., Ph.D. All dedicated books are labeled with bookplates commemorating those honored.

Fr. McGloin was a longtime residence hall advisor and teacher at Creighton University. The book dedicated to Fr. McGloin, This is Our Work: The Legacy of Sir William Osler, is a collection of photographs accompanied by quotations from Dr. Osler that have served to inspire physicians the world over.

Dr. Grinnell was a professor at Creighton University School of Medicine, researcher, and private practitioner for over 30 years. The book dedicated to Dr. Grinnell was Joslin’s Diabetes Mellitus, 14th edition.

In addition, Dorothy Grinnell, Dr. Grinnell’s wife of 61 years, made a donation to the library in memory of her husband. The Health Sciences Library is most grateful to Mrs. Grinnell for her generosity.

Mrs. Edward H Grinnell, with daughter Beth Matlock, visiting the Library
