

## PubMed

1. Perform a search and mark the references you would like to export to RefWorks (or leave the records unselected to export the entire result list to RefWorks).
2. Click on **Send to** [Send to:](#)  (middle right of screen).
3. Select **Citation Manager** from the resulting **Choose Destination** menu.

4. Upon selecting **Citation Manager**, you will be presented with a **Create File** option. Click on **Create File**.

5. **Save** the file. The file will be a **nbib** file.
6. After saving the file, log in to your **RefWorks** account.
7. Select **References/Import** from the toolbar.
8. Select **NLM PubMed** as the data source and **PubMed** as the database.
9. **Browse** to find the file you saved to your computer; double-click on the file to place it in the **Import Data from the following Text File** box.
10. Click **Import** (bottom right of screen).
11. The **RefWorks import screen** should appear – your records are in the **Last Imported Folder**. Click on **View Last Imported Folder** (lower right of screen).
