B.S.W., Major in Social Work

See the description for this interdisciplinary major, offered through the Department of Sociology and Anthropology on page 197.

B.A., Major in Justice and Society

See the description for this interdisciplinary major, offered through the Department of Sociology and Anthropology on page 165.

MEDICAL ANTHROPOLOGY MINOR

Program Description: The medical anthropology minor provides a holistic perspective utilizing both cultural and biological approaches to investigate human experiences of illness, suffering and healing and familiarizes students with anthropological research methods essential to medical anthropology. The minor explores how culture shapes healing systems; examines the relationships between healing and other social institutions; and investigates the political and economic influences on disease patterns and health outcomes. This minor will enhance the student's ability to provide health care to the culturally diverse populations that characterize contemporary America as well as providing health care in the global community.

Contact: Chair, Department of Sociology and Anthropology
