MATHEMATICS MINOR

Program Description: Mathematicians study concepts and theories used to solve problems involving quantitative relationships. Opportunities for mathematically-oriented graduates exist in such areas as physics, engineering, space technology, economics, business management, statistics, actuarial sciences, operations research, medical research, environmental sciences, and teaching. The Mathematics minor prepares graduates for positions in industry and teaching or to continue their education in graduate programs.

(All of the following:)

MTH 245	Calculus I	4 credits
MTH 246	Calculus II	4 credits
MTH 529	Linear Algebra	3 credits
MTH 545	Differential Equations	3 credits
Two additional MTH courses numbered 300 or above.		4 credits

MATHEMATICS LOGIC MINOR

Program Description: Mathematical logic is the study of the processes used in mathematical deduction. It has origins in philosophy. This is because the usual rules for inference and deduction can only be shown by nonmathematical argument. The program of study will examine the nature of formal systems including first-order and second-order logic. Methods of proof will be studied. Much of mathematical logic is based on the assumption that the notion of a set is unambiguous. This assumption was noticed not to be true over a century ago. Fuzzy set theory replaces the yes/no statement of set membership with a qualitative predicate. Related fields will be open to study, e.g., Algebraic Logic. Applications to Law will be featured.

Teacher Certification

Students who think they may teach Mathematics must consult with the Education Department, with the Mathematics Department, and with the appropriate agency in the state in which they intend to teach.

Certificate Program in University College

This department offers one certificate program to students in University College. See the description for this certificate on page 295 in the University College section of the Bulletin.
