Marc Rendell, MD is conducting a research study at the Creighton Diabetes Center

This study is for people who are at risk for developing major cardiovascular events, such as heart attack, stroke or hospitalization for chest pain.

We are looking for people who meet the following criteria:

1. People who have had a previous cardio-vascular disease event or have a condition of elevated LDL-C without a prior cardio-vascular disease event.
2. People must be over 19.
3. Must have been using one of the following medications at least 6 weeks prior to screening: atorvastatin, 40 or 80 mg once a day; rosuvastatin, 20 or 40 mg once a day; simvastatin, 40 mg or 80 mg once a day. Combination medications are acceptable. Under certain conditions alternative treatments will be accepted.

If you are interested in knowing more about this research study, please call (or e-mail):
