Dr Barbara Synowiecki, MSN, APRN, C-PNP with the help of Dr Misty Schwartz, PhD, RN is conducting a research study through the College of Nursing and the Osteoporosis Research Center.

Name of Study: 2-4-6 Formula Research Study

The study involves examining the nutrient intake and growth patterns of healthy infants that are being exclusively formula-fed. Researchers will do routine measurements on the infants at 2 months, 4 months and 6 months of age. Parents will be asked to keep a three-day diet record for each of these visits. A $50 gift card will be provided at the completion of each visit.

We are looking for people who meet the following criteria:

1. Infants between the age of 6 weeks and 2 months at the time of enrollment.

2. Infants that have been exclusively formula-fed since birth (may have been breast fed 7 days or less).

3. At least one English-speaking parent.

If you are interested in knowing more about this research study, please call:
