On-Campus Research Resource

The Creighton University Clinical Research Office is your on-campus resource for all your clinical research needs. The office is currently supporting over 40 clinical trials, multiple service grants and internally funded clinical research grants. We work with, but are not limited to, all School of Medicine programs including Internal Medicine, Surgery and Family Medicine. Read below for more information.

Types of Supported Research

- Phase 3-4 Pharmaceutical sponsored Clinical Trials for Creighton employed investigators
- Internal/external grants for Creighton Faculty (LB595/LB692/NIH)
- Investigator Initiated research and quality improvement (QI) services for Creighton investigators including Medical Students, Residents, Fellows and Faculty (pharmaceutical/ outside funding/unfunded)

Tobacco Programs

The Tobacco Program staff at Creighton University provides:

- Community education and advocacy regarding the prevention of tobacco use
- Tobacco cessation services including one-on-one and group sessions and worksite sessions. These sessions are included in Creighton’s benefits for employees and their spouses
- Tobacco research—e-cigarette use in the community
