Get to know our 2018 Summer Research Institute **Laboratory and Community Mentors!!!**

Here's a little more information about our 2018 SRI Mentors!

Since the program's inception, the Summer Research Institute has garnered the support of Creighton University's research faculty members to serve as mentors for our students. Through the years, these roles have grown to where some of these individuals mentor both our undergraduate and high school students. In addition to our Creighton faculty researchers, our program utilizes various community organizations and their directors to mentor our high school students as they create and conduct community-based participatory research with their organizations.
