Research shows that as many as 40 percent of Americans suffer from heartburn, which is a common symptom for a more serious condition known as Gastroesophageal Reflux Disease (GERD). Left untreated, GERD may cause ulcers in the esophagus, respiratory problems and esophageal cancer.

Grab a co-worker and learn more about GERD during a presentation by Bennie Upchurch, M.D., on:

**Tuesday, June 12**
Noon to 1 p.m.
Skutt Student Center, Room 104

He will discuss the following topics:

- Prevalence of acid reflux in the U.S.
- Clinical presentation/symptoms of GERD
- Medical and surgical treatment options

Dr. Upchurch has provided numerous lectures on reflux disease. He and his team at Creighton are available for consultations on GERD at:

Creighton University Medical Center
601 North 30th Street, Suite 5730
402.449.4692
