

DIVERSITY SUMMER HEALTH-RELATED RESEARCH EDUCATION PROGRAM (DSHREP)

Are you interested in biomedical research?

Each summer, the Office of Student Inclusion and Academic Enrichment at MCW-Milwaukee offers its signature programs to promote diversity in the medical field and provide an exceptional gateway to clinical careers. MCW's summer enrichment programs are designed for students from backgrounds that are historically underrepresented in medicine and biomedical research.

Program Dates:
May 30 - August 3, 2018

Application Deadline:
February 1, 2018
by 5 p.m. CST

DSHREP is supported through an R25 research education grant funded by National Heart, Lung, Blood Institute (NHLBI), an agency of National Institutes of Health (NIH).

Summer programs offered at no cost to students.

WHAT'S IN IT FOR ME?

During this ten-week program, you will have the opportunity to:

- Be an active member of a research team
- Explore career opportunities in research and health professions
- Benefit from a stimulating environment of education and mentoring
- Attend weekly lecture seminars on cutting edge topics
- Understand educational pathways
- Participate in professional development enrichment sessions

"The program offers a variety of exposures to those who are underrepresented in medicine and research."

- Program Participant
