A collaborative effort of the Health Sciences' Multicultural and Community Affairs (HS-MACA) and the Center for Promoting Health and Health Equity (CPHHE); the purpose of the Undergraduate Biomedical Research Program is to enhance college science education and provide research experience to increase the number of underrepresented minority students who are interested and qualified to pursue careers in the biomedical sciences and biomedical research. The HS-MACA/CPHHE Summer Research Institute promotes diversity in research and builds knowledge on research regarding various health disparities.

**Undergraduate Biomedical Research Program Description**

- Program Duration: Eight (8) weeks
- Program Timeline: June 10, 2019 – August 2, 2019
- Monetary Stipend: $1,750
