

# Neurology Occupational Therapy Fellowship Program

Fellowship experiences are an excellent way for new practitioners to advance clinical practice skills, research and teaching experiences to accelerate their careers.

The Creighton University Neurology Occupational Therapy Fellowship Program is committed to creating reflective occupational therapy practitioners who serve adults with neurologic conditions and their family and caregivers with a focus on respect for diversity, local and global service, and holistic care.

## NEUROLOGY OT FELLOWSHIP

### Program highlights:

- Specialize in neurorehabilitation practice at CHI Health Immanuel Rehabilitation Institute and Creighton University Medical Center–Bergan Mercy
- Practice in outpatient, inpatient rehab, acute care and university settings
- Experience interprofessional learning through case studies, curricular topics and interprofessional practice
- Engage in a research project during the fellowship
- Participate in teaching specialty content in lecture and lab activities with entry-level doctorate students
- Receive mentoring by highly motivated and experienced neurorehabilitation practitioners
- Prepare for your Physical Rehabilitation Board Certification through a focused fellowship program
