

# Pediatric Occupational Therapy Fellowship Program

Fellowship experiences are an excellent way for new practitioners to advance clinical practice skills, research and teaching experiences to accelerate their careers.

The Creighton University Pediatric Occupational Therapy Fellowship Program is committed to creating reflective occupational therapy practitioners who serve individuals and their families with a focus on respect for diversity, local and global service, and holistic care.

## PEDIATRIC OT FELLOWSHIP

### Program highlights:

- Specialty focus on outpatient pediatrics, feeding and swallowing, school-based and teaching
- Fellowship settings: outpatient pediatric clinic, behavioral school setting, NICU observation and university setting along with additional hospital and clinic observation opportunities
- Interprofessional learning opportunities: case studies, curricular topics, interprofessional sensory motor group
- Engage in a research project during the fellowship
- Participate in teaching specialty content in lecture and lab activities with entry-level doctorate students
- Mentoring by highly motivated and experienced pediatric practitioners
- Prepare for your Pediatric Board Certification through a focused fellowship program
