

# Norton Thoracic Institute

## Cardiovascular and Thoracic Surgery

# Kevin Brady, MD

Kevin Brady, MD, is a cardiovascular and thoracic surgeon and serves as Chair of the Cardiovascular Surgery Department and Surgical Director of Mechanical Circulatory Support at the Center for Advanced Heart Disease at St. Joseph's Hospital and Medical Center. Dr. Brady has been a well-respected member of the Phoenix Valley's medical community for more than a decade and a *Phoenix Magazine* "Top Doc" since 2004.

Dr. Brady has special interest in mechanical circulatory support and advanced heart failure treatment. Dr. Brady has longstanding expertise in transcatheter aortic and mitral valve replacement. He is one of the busiest surgeons performing off-pump coronary artery bypass grafting. In addition, he has extensive experience and interest in mitral valve repairs as well as surgical treatment of aortic and aortic valve pathology. Dr. Brady works closely with the lung transplant team to assist with concomitant lung transplant and cardiac surgical procedures.

Dr. Brady is a current member of the Society of Thoracic Surgeons and International Society for Heart and Lung Transplantation. He has given oral presentations on penetrating cardiac trauma to the American College of Surgeons and the Southeastern Surgical Congress, and on the total artificial heart as an alternative to cardiac transplantation to the 2002 Fellow's Conference: Advances in Organ Transplantation.

### Research

Dr. Brady's current research studies include the Pivotal TAVR trial (ongoing), the Abbott COAPT trial on mitral valve repair (ongoing) and development of an Atricure left appendage exclusion device study with Barrow Neurological Institute.
