

CIPER Associates and Scholars Program

In response to the need for interprofessional faculty development on Creighton's campuses, CIPER (Center for Interprofessional Practice, Education and Research) established the Associates and Scholars Program in the fall of 2024.

The purpose of the program is to develop Interprofessional Education (IPE) champions who will work to advance CIPER's mission, vision and strategic plan at Creighton University.

We hope that upon program completion, participants will be able to:

- Articulate the benefits of IPE and Interprofessional Collaborative Practice (IPCP) for learners and patients,
- Describe interprofessional learning outcomes for the Creighton University health sciences graduate, and
- Develop strategies to effectively implement IPE and IPCP in their practice settings.

Lindsay Iverson, DNP, APRN, ACNP-BC
*Director of Clinical & Simulated Learning Environment
Associate Professor
College of Nursing
Creighton University*

"Participating in the CIPER Associates and Scholars program significantly enhanced my interprofessional learning and connected me with other individuals who are passionate about IPE. It provided me with invaluable insights into collaborative practices and equipped me with the strategies to effectively implement interprofessional activities and assessment for my students. Thanks to this program, I gained a deeper understanding of how to foster teamwork among diverse professionals - and successfully implemented our interprofessional escape room activity!"

Carrie Bose, OTD, OTR/L, BCP
*Phoenix On-site Occupational Therapy Pathway Coordinator
Assistant Professor
AOTA Board Certification in Pediatrics
Department of Occupational Therapy
School of Pharmacy and Health Professions - Creighton University*

"The CIPER Associates and Scholars program has been a great point of mentorship and guidance for refining our interprofessional experience we had already established in Phoenix at First Place between occupational therapy and pharmacy. We knew the importance of establishing specific IPE's to meet our community and student's needs but benefited from the additional time and mentorship in developing a research agenda to help share our program outcomes. The modules and meetings saved us so much time in the long run by providing resources and best practices for interprofessional education, research and assessment."
