--	--------------------------	--	--------------------

Introduction

To protect the health of Creighton University School of Pharmacy and Health Professions (SPAHP) students and the patients they serve, and in accordance with contractual arrangements with varied health-related institutions, students in programs which have an experiential education component must meet specified requirements including immunizations, health insurance coverage, and acceptable criminal background checks before being enrolled in any of the School's practice-based academic programs.

Students in programs which have an experiential education component must remain compliant with the immunization, health insurance coverage, and acceptable criminal background check requirements, as well as achieving and maintaining cardiopulmonary resuscitation (CPR) basic life support (BLS) certification and completing annual training in standard precautions, HIPAA requirements, Blood Borne Pathogen (BBP), Title IX, Harassment, and Discrimination Training, and Child Abuse Prevention to participate in experiential education activities. Proof of compliance with all of the items listed above will be required by Experiential/Clinical Education Directors, and may be required by clinical instructors, preceptors, or fieldwork educators, before students can be placed or accepted at educational experience sites. Students who have failed to remain compliant with these requirements will not be allowed to participate in experiential education activities and may be subject to dismissal from the School. At a minimum, non-compliance with this policy may impact or delay the student's date of graduation.

Immunization Requirements

Creighton University has immunization requirements and procedures for Health Science Students. The Health Science Student Immunization requirements and procedures can be viewed on the Immunization Requirements webpage: <https://www.creighton.edu/student-experience/safety-well-being/physical-wellness/immunization-requirements>

If students have questions about immunization compliance, they should contact CEOAonboarding@creighton.edu.

Students considering international experiential training should be aware that additional immunizations may be required in order to comply with health requirements outside of the United States.

Health Insurance Requirements

The University requires all full-time students to have comprehensive health insurance coverage. Students should consult the Health Insurance Information webpage for more information: <https://www.creighton.edu/student-experience/safety-well-being/physical-wellness/health-insurance-requirements>

Criminal Background Checks

All SPAHP students will be required to submit to and receive an acceptable criminal background check as a condition of enrollment. Acceptable student backgrounds for enrollment will be determined by each program's Admissions Committee in consultation with the Experiential Education Director. Background investigations will be conducted via a contractual arrangement with an outside vendor at a frequency to be determined by the Experiential/Clinical Education Director of the student's program of study. Some clinical facilities may require additional background investigation(s), including those that require fingerprinting, prior to permitting students to participate in experiential education activities, and this will be at the student's expense. Program enrollment and clinical facility placement are contingent upon completion and receipt of an acceptable criminal background investigation. Acceptable student backgrounds for experiential education participation will be determined by the Experiential/Clinical Education Director in consultation with selected faculty. The investigational screenings will include, but may not be limited to, the following for every state and county of residence or where experiential placements may occur: criminal record, alias name, warrants, protection orders, residential history, social security number, abuse registry, sex offender registry, Office of the Inspector General (OIG) cumulative sanction report. All students must also successfully complete annual compliance training (ex. Child Abuse Prevention, Title IX, BBP, HIPAA) online to participate in experiential education.

Cardiopulmonary Resuscitation (CPR) Basic Life Support (BLS) Certification

All SPAHP students are required to obtain and maintain biennial certification in CPR-BLS for the healthcare provider from the organization required by their individual program of study or the educational experience site. All incoming students must attend the mandatory CPR-BLS classes scheduled during orientation and upload the certification to the appropriate computer systems by September 1 and repeat the certification if their program of study extends beyond two calendar years. The School will inform students of CPR-BLS for the healthcare provider courses offered as well as their respective costs. Students will be responsible for the cost of the certification program.

Standard Precautions

The Occupational Safety and Health Administration (OSHA) standard for Occupational Exposure to Blood borne Pathogens (29 CFR 1910.1030) is designed to eliminate or minimize occupational exposure to Hepatitis B Virus (HBV), Human Immunodeficiency Virus (HIV) and other blood borne pathogens. Healthcare

<i>Policy: Administrative</i> Experiential Education Participation	<i>Issued:</i> 5/6/97	<i>Revised:</i> 11/27/18; 11/30/21; 4/20/26	<i>Page 3 of 4</i>
--	--------------------------	--	--------------------

professionals face a significant health risk as the result of occupational exposure to blood and other potentially infectious materials because they may contain blood borne pathogens, including hepatitis B virus, which causes serious liver disease, and human immunodeficiency virus, which causes Acquired Immunodeficiency Syndrome (AIDS). OSHA has concluded that this exposure can be minimized or eliminated by using a combination of engineering and work practice controls, personal protective clothing and equipment, training, medical surveillance, Hepatitis B vaccination, signs and labels and other provisions. Therefore, all students in the SPAHP are required to complete training sessions on Standard Precautions to decrease exposure to blood borne pathogens prior to engaging in experiential education activities.

Health Insurance Portability and Accountability Act (HIPAA)

To protect patient health information, the Health Insurance Portability and Accountability Act (HIPAA) of 1996, Public Law 104-191, required the Department of Health and Human Services (HHS) to establish national standards for electronic health care transactions and national identifiers for providers, health plans, and employers, as well as the adoption of federal privacy protections for individually identifiable health information. In response to the HIPAA mandate, the HHS developed the Privacy Rule, which established national standards to protect and guard against the misuse of individually identifiable health information for certain health care entities (i.e., health plans, health care clearinghouses, and health care providers who conduct certain health care transactions electronically). Since students are routinely exposed to patients' protected health information and must comply with health care facilities' policies and procedures, all students in the SPAHP are required to complete HIPAA and Privacy Rule training sessions prior to engaging in experiential education activities.

Drug Testing

Some health care facilities require students to submit to and pass a drug test prior to participation in experiential activities at the facility. This testing is at the student's expense. Students who do not complete or do not pass a drug test as required by these facilities will not be allowed to participate in experiential education activities at the facility, and may face sanctions, including possible dismissal from the program.

Conclusion

Non-compliance with any portion of this policy may impact or delay the student's date of graduation or the ability to continue in their program of study. Students who fail to remain compliant with any of these requirements will not be allowed to participate in experiential education activities and may be subject to dismissal from the School.
