<i>Policy: Clinical and Education Work Hours</i>		Page 1 of 3				

PURPOSE

GME Programs, in partnership with Creighton University, must design an effective program structure that is configured to provide residents with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

SCOPE

This policy applies to all Creighton University Internal Medicine residents.

POLICY

DEFINITIONS:

Clinical and Educational Work Hours: Clinical and educational work hours are inclusive of all in house clinical and educational activities, clinical work done from home, and all moonlighting. It does not include:

- Educational activities, research or studying done at home.
- Work from Home: Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.
- Moonlighting: Moonlighting is defined as any voluntary activity, not related with training requirements, in which an individual performs duties as a fully-licensed physician and receives direct financial remuneration. The hours spent moonlighting are counted towards the total hours worked for the week. No other duty hour requirements apply; however, Moonlighting must not interfere with the ability of the resident to achieve the goals and objectives of the educational program.
- Day off: One continuous 24-hour period completely free from all administrative, clinical and educational activities. Home call cannot occur on a day off. Only rarely can a post call day and day off coincide. The day off should still be 2 for 24 hours.
- Work hour flexibility: Residents who have appropriately handed off patients following the conclusion of scheduled work periods have the flexibility to voluntarily remain at work in unusual circumstances, if, in their judgment, those circumstances benefit patient care or education. Such additional time must be counted toward the 80-hour limit. The resident must not stay if fatigued or unfit to provide safe patient care.

Policies and Procedures

<i>Section:</i> School of Medicine		<i>NO.</i>

<i>Policy: Clinical and Education Work Hours</i>		Page 2 of 3				

- It is important to note that a resident may remain or return only if the decision is made voluntarily.
- Residents must not be scheduled beyond work period restrictions or required to stay by an attending or more senior resident/fellow.

POLICY:

Clinical and educational assignments must be assigned while recognizing that faculty and residents collectively have responsibility for the safety and welfare of patients. The ACGME common program requirements recognize that residents may choose to work beyond their scheduled time, or return to the clinical site during a time off period to care for a patient. The requirements preserve the flexibility for residents to make those choices as long as residents recognize the responsibility to work rested and fit for duty.

Resident Logging:

- Residents are required to document their duty hours in New Innovations weekly.
- In the case of a duty hour violation, the resident must document why there was a violation. The Program Director will then review and document on that violation. A violation may be justifiable, but the Program Director must approve. Please see the section on flexibility to see examples of what is justifiable.

Time off between scheduled clinical work and education periods:

- Residents should have eight hours off between *scheduled* clinical work and education periods.
- Residents must have at least 14 hours free of clinical work and education after 24 hours of in-house call.

Days off:

- Residents must be scheduled for a minimum of one 24-hour day in seven free of clinical work and required education. This can be averaged over four weeks to allow flexibility in scheduling time off. Home call cannot be assigned on a free day.

In House Call:

- Residents must not be scheduled for in-house call no more frequently than every third night and in-house call cannot be averaged over a four-week period.
- Work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. A resident may have an additional 4 hours for care of established patients. These additional 4 hours cannot include ambulatory work or new patients to care for.

Policies and Procedures

Home Call:

- Does not require a rest period after an assignment of home call overnight.
- At home call is not subject to the every third night limitation but must not be so frequent or taxing to preclude rest or reasonable personal time for each resident.

Night Float:

- Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements.
- Night float cannot be taken back to back with any other rotation that excludes continuity clinic such as ICU or off-site electives.
- Residents cannot be assigned more than eight weeks of night float per year or no more than 16 weeks in three years. Consecutive blocks are not allowed.

Ambulatory:

- At least one third of training must be in Ambulatory.
- Exposure to IM sub-specialties, Neurology and Geriatric Medicine.
- Must take at least four weeks of emergency medicine in no less than two-week blocks; must not exceed two months in three years.

Critical Care

- A minimum of 12 weeks of ICU and no more than 24 weeks in three years of training.

Inpatient

- At least one third of training must be inpatient.
- Exposure to IM sub-specialties, Neurology and Geriatric Medicine.
