Assistant Professor
Fellowship Director
School of Pharmacy & Public Professions, Department of Occupational Therapy
Creighton University Gerontology Occupational Therapy Program
2500 California Plaza, Boyne 141
Omaha, NE 68178

Dear Dr. Greiner:

The AOTA Fellowship Program Review Committee (FPRC) met to review your Substantive Change Form submitted on behalf of the following programs: (1) Creighton University Gerontology Occupational Therapy Program, (2) Creighton University Neurology Fellowship Program, and the (3) Creighton University Pediatric Fellowship Program. After a thorough review of all documentation and materials associated with your submission, the decision was to approve the transition of these programs back to Active Status, to be effective beginning Wednesday, March 17, 2021. As a point of reference, the two questions from the reviewer and your responses are outlined below.

FPRC Findings:

Question 1: Any changes for the mentors:

Response: No the expectations of the mentors remain the same on both the academic and clinical perspectives.

Question 2: Is the didactic component consistent with the previous program documentation?

Response: Yes, the didactic component remains unchanged. We engage in a good amount of inter-professional collaboration and didactic content with our Physical Therapy Residency programs. Their programs are approved to resume in the following cycle as well.

Congratulations in getting your programs active again. If there are any questions or concerns about the reviewer's decision, please do not hesitate to contact AOTA Fellowship staff (fellowship@aota.org or (301.652.6611 x2964).

Sincerely,

Sabrina Salvant, EdD, MPH, OTR/L
VP, Education & Professional Development
