

2025 Bellucci Symposium
on Noise Related Hearing Loss
Friday, 23 May 2025

Thanos Tzounopoulos, PhD
Bellucci Pioneer Award Recipient
University of Pittsburgh
*Mechanisms and Treatment
Development for Noise-Induced
Hearing Loss*

Claudio Grassi, MD, PhD
Università Cattolica del Sacro Cuore
*Decoding the link between
noise-induced hearing loss and
cognitive decline*

John Oghalai, MD
University of Southern California
*Medial olivocochlear efferent
activity in the mouse cochlea*

Daniel Polley, PhD
Harvard University
*Tinnitus and Hyperacusis:
Mechanisms, Measurements, and
Proof of Concept Therapies*

Courtney Stewart, PhD
Veterans Administration, Ann
Arbor, Michigan
*Vestibular consequences of
environmental noise*

Vinay Parameshwarappa, PhD

Bellucci Trainee Award
Aix-Marseille University
*Investigating the mechanisms of GABAergic
homeostatic plasticity after noise-induced
hearing loss*

Avril Genene Holt, PhD

Wayne State University
*Noise-induced changes in neuronal
activity and calcium dynamics beyond
the periphery*

Kevin Ohlemiller, PhD

Washington University
*Cochlear fluid homeostasis after noise
exposure*

Mark Rutherford, PhD

Washington University *Effects of AMPA
Receptor Composition on Ribbon
Synapse Structure and Cochlear
Function*

*Special Conversation with Shari Eberts, Hearing
Science Communicator and Advocate, and Allison
Coffin, PhD, Associate Professor at Creighton
University and Co-Founder and President of the
Association of Science Communicators*

**Please register for in-person attendance
by 16 May for complimentary lunch and
refreshments**
